Introduction

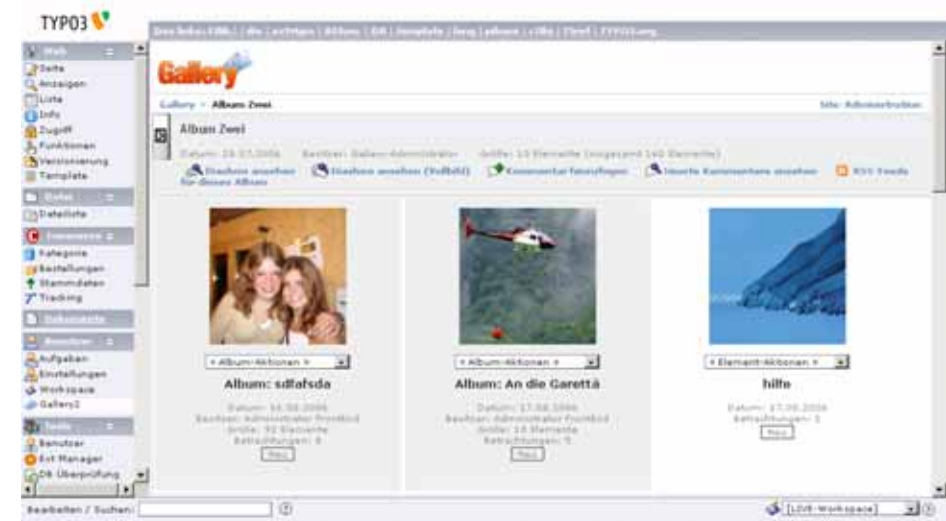

Required

To use this extension please install the gallery2-application first. You can find the download and documentation of Gallery2 on <http://gallery.menalto.com>

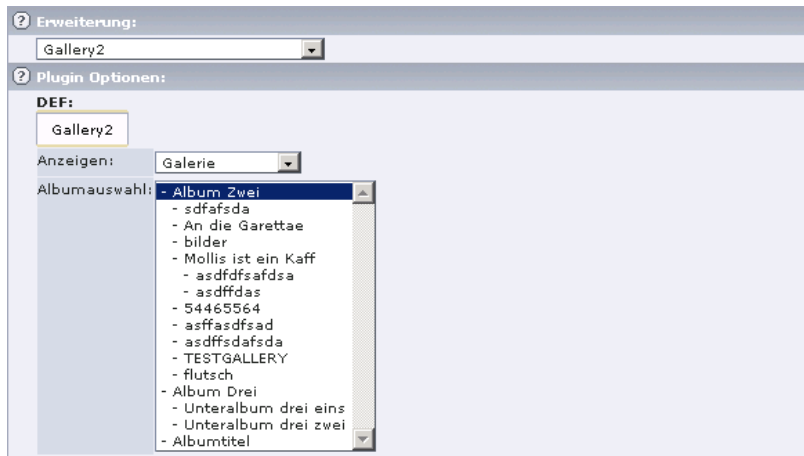

What does it do?

- Integrate Gallery2 in a Backend-Module
- Integrate Gallery2 in Frontend (FE-Plugin)
 - Display the complete gallery
 - Display random albums/images
 - Display the recent album/image
 - Display random images of recent albums
 - Display the complete gallery with a singleview of pictures on the same page (AJAX-Based)
- Embed-Class to support working with other extensions (experimental).

Users Manual

Note:

Please look into the forum:

<http://gallery.menalto.com/node/51887>

This is an Alpha-Version. If you find a bug please remember me over email: pmueller@juhui.ch, thanks.

If you have a question, send me an email.

Administration

You must set the relative path from document-root to Gallery2. Default's: gallery2

```
$TYPO3_CONF_VARS['EXTCONF']['gallery2']['g2RelPath'] = 'gallery2';
```

You can define the parent module of gallery2 (Web, User...). Default's: user

```
$TYPO3_CONF_VARS['EXTCONF']['gallery2']['g2mainMod'] = 'user';
```

Installation

Install the extension with the extension manager. If you already use an older version of gallery2, you can overwrite it while the installation.

FE-Embedding

Developers

- Philipp Müller (pmueller@juhui.ch)

Sponsors

- The gallery2-Extension was sponsored by:
 - Jud Informatik+Grafik GmbH, Uznach (www.juhui.ch)
 - linth24.ch GmbH, Uznach (www.linth24.ch)
 - juhuimedia GmbH, Uznach (www.juhuimedia.ch)

fails	integer	Maximum fails on display: randomImages, randomAlbums	5	
dontlink	boolean	Remove link tag (only on random-functions)	0	

CSS-Configuration

An Example-stylesheet you can find on <http://www.linth24.ch/fileadmin/templates/extensions/gallery2/gallery2.css>

Known problems

- I don't tested this extension with Gallery2-Multisite!
- Don't run with RealURL! You can disable RealURL on the gallery-pages in the realurl-configuration.

TODO

- Use Gallery2-Extension on two different domains.
- Add more options to the api
- Add Fe-User synchronisation
- Testing the extension for Gallery2-Multisite supporting!
- More language-support for backend.

Changelog

See the file gallery2/ChangeLog for more details.
