Introduction

What does it do?

– Extends the RealURL extension to enable the path segments field in alternative page languages.

– There are no configuration to perform

– Once installed, edit an alternative page language content element and a new field will be present: "Speaking URL path segment".

– To make sure new path are generated by RealURL, delete all the records related to RealURL in the database.

– This extension was donated by Adaltas, French design firm specialised in website creation and content management.
